

**Job Title:** Customer IT Support Technician

**Location:** Bedale, North Yorkshire

**Hours:** Full Time (36.5 hours p.w.)

**Salary:** £20,000 to £22,000 (Band D) Dependant on Experience

**Closing Date:** TBA

### Summary:

WJP Software Limited are a small software development and Consultancy Company based in Bedale on the edge of the Yorkshire Dales. We specialise in writing software for NHS, private healthcare and public sector organisations. We have a combination of .net Client and Web Applications we develop and support. We are looking for a dedicated, reliable, and efficient person to become an expert user of our software and provide IT support to our expanding customer base.

The job will involve working with and understanding the software we develop, therefore you will have competent IT skills, both hardware and software. We are also looking for a team member who can offer advice, pass a query onto our developers and install software and setup systems. You must also have a high level of attention to detail, effective organisational and communication skills (both written and interpersonal) and experience of providing excellent customer service.

This job is offered on a full time basis. You will have the opportunity to be actively involved in the ongoing development of the business. You must be self-motivating as you will be required to work without supervision frequently.

### Job Description:

**Responsible to:** Managing Director

- To become an expert user of WJPS systems.
- Provide first line support to customers, in relation to our software and installed systems.
- Ensuring that the support system is kept up to date, logging issues from customers, and assigning issues with the relevant detail is initially captured. This includes speaking with customers and providing support and knowledge.
- Develop skills to be able to install, configure and manage our software, both remotely and onsite.
- Test and validate software written by our development team.
- Install Applications on Client Machines and help setup MS SQL and API's on servers. This also includes hardware we interface with.
- Installing Web Applications on Microsoft and Apache Servers

<b>Document:</b>	Customer IT Support Technician	<b>Version:</b>	2.0

- Assisting in the creation of marketing documentation, and website content, for both us and customers.
- Update and manage system documentation in line with the latest version of the software. Including documenting on our support desk solutions that you have used for client fixes.
- Assisting with general office tasks.
- Any other relevant duties as directed and in line with the post.
